# **EXPLANATION**

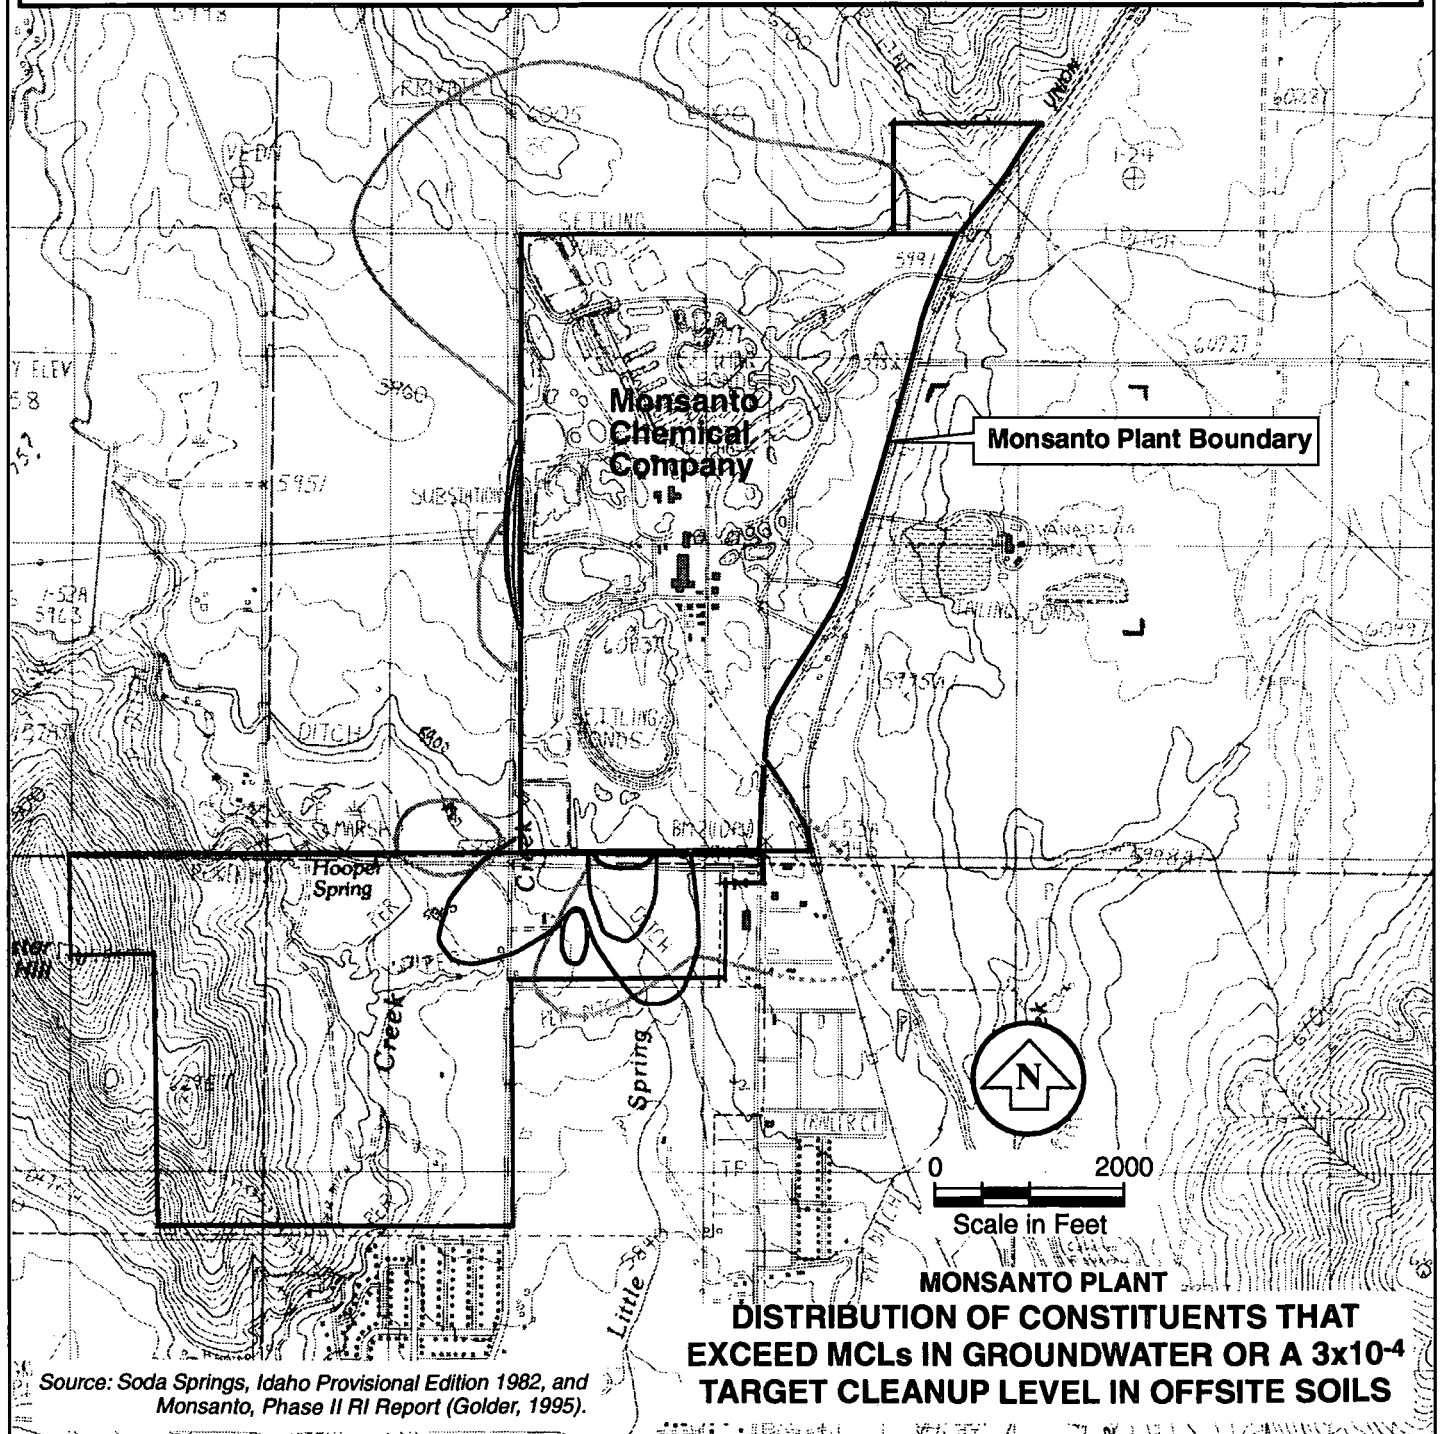

## **Groundwater Area Potentially Affected above MCLs**

## **Soil**

- Fluoride 4.0 (mg/l)
- Selenium 0.05 (mg/l)
- Cadmium 0.005 (mg/l)
- Nitrate 44.0 (mg/l)

- Area where Radium-226 concentrations exceed the TCL of 3.7 pCi/g
- Area boundary is inferred due to inadequate bounding data or uncertainty of constituent source(s)

The areas shown are based on analytical data from soil samples collected from the 0-1" depth interval.
